DETAILED ACTION

Allowable Subject Matter

Claims 2, 4-20 are allowed.

The following is an examiner's statement of reasons for allowance:

As discussed in the previous office action, a connector plug part for optical fiber plug is known in the art. Theuerkorn et al reference (US 6,672,774 B2) is the closest prior art of record.

Theuerkorn reference discloses a connector plug element having a film hinge that pivot between open and close positions. Figs. 9A and 9B of Theuerkorn explicitly illustrates this feature (see below).

However, none of the prior art fairly teaches or suggests such fiber optic connector-plug part, wherein such pivoting joint is disposed between a pin-receiving section and a cable receiving section of the connector-plug part, as claimed in the instant application.

Art Unit: 2874

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
